

MOTIP Spot Blender

Ord.-no.: 00108

Technical Information

Blend the transition between the old and the new lacquer layer in case of spot repairs on your car with MOTIP Spot Blender. The blending properties of the spray enable a smooth blend between new and old paint to be achieved. MOTIP Spot Blender has a fine and precise jet-spray which enables an instant and invisible result.

Quality & properties

- As a result of the blending of the overspray, a smooth transition is obtained between the old and the new lacquer
- Instant (in)visible result
- Directed jetspray
- Fine spray

Physical & chemical data

- Base: Organic solvents
- Colourname: transparent
- Smell: Characteristic
- Degree of gloss: gloss, >75 GU
- Minimum Working Temperature: 10 °C
- Maximum Working Temperature: 25 °C
- Vapour pressure: 4000/20 bar
- Storage stability: 10 y
- Content: 150 ML

How to use

- Before use, carefully read the directions on the packaging and act accordingly.
- The aerosol should have room temperature. Best processing temperature 10 to 25°C. Before use, shake the aerosol.
- The spot blender can be applied when the lacquer is tack free.
- Spray the surface with spot blender till the overspray blends like a film.
- The drying time depends on the ambient temperature and the humidity of the air.

Environmentally sound

European Aerosols is committed to apply formulations without restricted or critical ingredients and to achieve best possible performance. The caps and packagings are made of recyclable material.

Disposal

Only the completely emptied cans should be put into the recycling skip or appropriate container for reclaimable refuse. Cans which are not empty should be disposed off as "special refuse".

Marking/Labeling

All products made by European Aerosols comply with the actual labelling regulations according to Preparation Guideline 1999/45/EG. All aerosols correspond to TRGS 200 and TRG 300 as well as to aerosol guideline 75/324/EWG in the actually valid version.
